

SEASONAL MEMOIR

Design Philosophy

Death is not the end,
but rather the act of forgetting!

Introduction

In a tranquil pixelated world, a young girl lost her beloved dog physically. In attempts to gain her lost memories with the dog, the girl embarks on a journey, navigating through a maze of obstacles and collecting fragments of her memories. Aggregating all the shards together symbolizes the complete recollection of memory, and that the loyal companion will live in her memory forever.

Developed in Elm, Powered by Gitea, and Engineered by H.O.W.
Special thanks go to the professors, Manuel and Michele, and the TA group, as well as the JI, for their great support and guidance.

Best Features

Engaging Gameplay: The combination of parkour-style running, jumping, and gliding mechanics, along with challenging obstacles and puzzles, will keep players engaged and entertained.

Pixel art and Healing Atmosphere: Players will enjoy the serene and beautiful pixel art visuals, soothing music, and immersive storytelling, creating a calming and therapeutic experience.

Character Development and Progression: Players will enjoy watching their protagonist grow and evolve throughout the game, uncovering the secrets of the four-season world, immersing players in a captivating and engaging narrative.

Combining the charm of pixel art, the joy of exploration, and the therapeutic effect of a healing atmosphere. We want to create a game that allows players to escape from the stresses of everyday life and embark on a journey of self-discovery and reflecting on the true meaning of lives.

Challenges

- Appropriate puzzles.
- Detailed animations.
- Not giving redundant tips.
